SHEET METAL

—AS—

INTERIOR DECORATION AND FINISH.

SHEET METAL WORK for ceiling decoration and finish has long been used in Europe, while in this country it has only recently been introduced, and it is therefore comparatively little known. As used for Ceiling Center Pieces it possesses great advantages over the heavier and more expensive stucco and cast work, which will at once recommend it to those in want of ornamentation of this character.

The principal advantage claimed for sheet metal center pieces is the extremely low price at which they can be sold, beauty of finish, durability, lightness, the ease with which they can be put up, and the fact they may be shipped without danger of breakage.

These Centers are all finished before leaving the Factory, and painted a lustreless white to correspond with plaster finish of ceiling, and are priced in this way. They can, however, be painted and ornamented to suit the taste of purchasers, and to correspond with style and decoration of room where used. These Centers are simply screwed to the ceiling joists, and can at any time be taken down, cleaned and replaced without damage to the ceiling or center piece.

We present, also, a few designs of Sheet Metal Interior Cornices and Ceilings, which we will be pleased to price on application, and which will be found far cheaper than work of corresponding style in any other material. Another, and probably the chief advantage of this class of work, is its extreme light weight as compared with stucco, and the fact that it will not crack or fall off, and is not injured by water.

Correspondence solicited. Always state whether work is to be sent by express or freight.
